***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-2 and 4-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Iwakirii et al., WO 2004011553 for the reasons furnished in the October 29, 2009 correspondence.

Applicant has amended the claims such that they now stipulate that there must be less than 5 parts of plasticizer per 100 parts of the polymer component whereas the reference contemplates the employment of no less than 5 parts of plasticizer. While it is appreciated that there is no longer any overlap in the ranges pertaining to the amount of plasticizer, it remains the contention of the Examiner that the claims are unpatentable over the prior art insofar as the ranges are still abutting one another and, in this connection, it has been decided that, "a prima facie case of obviousness exists where the claimed ranges and prior art ranges do not overlap but are close enough that one skilled in the art would have expected [the claimed product and a product disclosed in the prior art] to have the same properties." *Titanium Metals Corp. of America v. Banner*, 778 F.2d 775, 227 USPQ 773 (Fed. Cir. 1985). While Applicant intimates that similar properties are not, in fact, observed when the threshold of 5 parts of plasticizer is exceeded- on page 9, third full paragraph of their arguments, they characterize the properties of the composition of composition of Example 1 as being superior to those of

Art Unit: 1796

Example which is notable since both of these are seemingly regarded as exemplary of the invention as originally claimed- the Examiner fails to appreciate in what way the properties of the former are regarded as being superior as there is no explanation of Applicants' remark. Because it is not clear to the Examiner how the new upper endpoint of the range associated with the amount of plasticizer represents a critical point beyond which there is an unexpected reduction in properties, the claims are still regarded as unpatentable.

***Allowable Subject Matter***

Claims 17 and 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 1796

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
